LOKESH BABU ADUSUMALLI

CYBERSECURITY STUDENT | ASPIRING SOC ANALYST

Bengaluru, India | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Information Science and Engineering student at Dayananda Sagar College of Engineering, Bengaluru, building practical skills for a Junior SOC Analyst role. Project experience includes Windows security-log analysis, endpoint monitoring, network reconnaissance, and a controlled Kali Linux lab. Interested in security monitoring, alert investigation, threat detection, and incident response.

TECHNICAL SKILLS

Cybersecurity	SOC fundamentals, security monitoring, log analysis, incident-response concepts, vulnerability assessment, network security, OWASP fundamentals
Tools	Kali Linux, Nmap, Wireshark, Burp Suite, Windows Event Viewer, Sysmon, VirusTotal, AbuseIPDB, Splunk fundamentals
Technical	Python, Linux, Windows, computer networking, Git/GitHub, REST APIs, SIEM fundamentals

PROJECTS

Cryptographic Attribution & Immutable Decryption Provenance for Multi-Recipient Encrypted Document Distribution | SIH 2026 — Team Leader

- Designed a secure document-distribution prototype concept for authorized recipients and per-decryption forensic attribution.
- Implemented and tested AES-256-GCM protected-document handling in a FastAPI backend prototype.

Endpoint Security Monitoring & Detection | Kali Linux, Windows

- Built a controlled attacker–defender lab to practice endpoint monitoring and examine security-relevant activity.
- Reviewed authentication, account-management, process-creation, and service-installation events; documented findings.

Windows Security Event Log Analysis | Windows Event Logs

- Analyzed 881 Windows events, including authentication activity, account creation, group changes, and process-creation events.
- Recorded investigation findings and reviewed event patterns for security relevance.

Host-Based Network Reconnaissance & Service Enumeration | Nmap, Linux

- Performed authorized host and service discovery in a controlled lab; documented ports, discovered services, and observations.

Attack Investigation & Reconstruction Platform | In progress

- Planned SOC-oriented workflow to correlate logs and evidence, reconstruct an attack timeline, and document investigation findings.

EDUCATION

B.E. Information Science and Engineering 2024 – Present

Dayananda Sagar College of Engineering, Bengaluru, India

CERTIFICATIONS & TRAINING

- Microsoft Student SOC Program Foundations — Training
- Cisco Networking Academy — Introduction to Cybersecurity
- AIG Shields Up Cybersecurity Job Simulation — Forage
- XYTHERA CTF Participation Certificate — College CTF conducted in partnership with AWS

LEADERSHIP & PRACTICE

- Team Leader — Smart India Hackathon 2026 project on cryptographic attribution and decryption provenance.
- Ongoing hands-on cybersecurity labs and practical security simulations.
